

I used referral code:

```
FlutterBluePlus.scanResults.listen((results) {
  for (ScanResult r in results) {
    // if (r.device.localName.isEmpty) return;
    debugPrint(
      '${r.device.localName} found! rssi: ${r.rssi}-- time:
${DateTime.now()}');
  }
});

await FlutterBluePlus.startScan(
  // oneByOne: false,
  timeout: const Duration(seconds: 4),
  removeIfGone: const Duration(seconds: 1),
);
```

The operation effect is as follows:

I/flutter (23263): found! rssi: -89-- time: 2023-09-08 16:58:36.582791 I/flutter (23263):

If I don't stop the program, it keeps printing。

You can also see that there are Bluetooth devices containing names.

Why when I add in the code:

```
if (r.device.localName.isEmpty) return;
```

Complete code:

```
FlutterBluePlus.scanResults.listen((results) {
  for (ScanResult r in results) {
    if (r.device.localName.isEmpty) return; // add this
    debugPrint(
      '${r.device.localName} found! rssi: ${r.rssi}-- time:
${DateTime.now()}');
  }
});

await FlutterBluePlus.startScan(
  // oneByOne: false,
  timeout: const Duration(seconds: 4),
  removeIfGone: const Duration(seconds: 1),
);
```

Run the program again, the console prints are as follows:

```
D/FBP-Android: [FBP-Android] onMethodCall: isAvailable D/FBP-Android: [FBP-Android]
onMethodCall: getAdapterState D/FBP-Android: [FBP-Android] onMethodCall: startScan
D/BluetoothAdapter(23709): isLeEnabled(): ON D/BluetoothLeScanner(23709):
onScannerRegistered() - status=0 scannerId=7 mScannerId=0 D/FBP-Android: [FBP-
Android] onMethodCall: stopScan D/BluetoothAdapter(23709): isLeEnabled(): ON
```
